

NEREIDA RONDON

Lehigh Acres, FL | 239-634-5141 | Nereida.Rondon5@gmail.com | [LinkedIn](#)

OBJECTIVE

I am an accomplished professional of 18+ years with great interpersonal and communication skills, developed early on in my previous experiences in customer service and perfected in my time as an educator. I revel in finding the root to ongoing challenges while making standard practices and processes more efficient. I aim to bring value to a team of developers as we enhance user experiences, complete software testing, and diagnose development issues and their causes to create viable solutions. I have 10+ years of collaborating with peers, as well as guiding and training inexperienced team members. If anything is constant in the Education field, it is CHANGE, I have been successful learning new technologies by being receptive to changes and being hands on, a transferable skill that will bring me success in frontend development.

WORK EXPERIENCE

Math Content Writer | Study.com (REMOTE 12-month contract)

February 2022 to Present

- Produced longform math lessons for online publication on SaaS platform
- Used Latex mark-up language in content writing
- Created graphic images using geogebra.com
- Conducted research on math topics and provided source references for material as needed

Math Teacher | School District of Lee County, Fort Myers, FL

January 2012 to Present

- As department chair of 14+ teachers, I trained and supported teachers with new technologies and initiatives.
- Maintained a student success average of 75% pass rate on the Geometry EOC state exam for the last 4 years, based on 120+ students per school year.
- Provided technical support through email, over the phone and during in-person trainings to other teachers. Also, provided technical support to students in person, via email, and through google classroom LMS.
- Planned and recorded 100+ video lessons for Geometry and Calculus, for students to access via Google Classroom LMS as needed.
- Demonstrated ability to work independently in a deadline-driven environment without direct supervision while managing multiple projects and responsibilities. Wrote and shared weekly lesson plans for two different courses with administration via google sheets, for a total of 72+ lessons per school year.

- Communicated with team on a weekly basis via email and department meetings to keep department well informed. Communicated departmental issues to Administrators via email and in-person meetings. Communicated with parents and stakeholders about student progress and other matters they cared about.
- Integrated technology in the classroom, included: Promethean board, document camera, Google Classroom LMS, and countless SaaS platforms. During hybrid teaching, I converted 7 paper unit tests to digital by using the Edulastic platform.
- Fostered open communication in a culturally diverse setting by creating a work environment where participants knew the expectations, routines, and could fail safely with the opportunity to try again.
- Collaborated, biweekly, with a team of 4 teachers to gather and analyze student data to discuss student progress and guide instruction and remediation throughout the school year for 400+ students in our team.
- Conducted continuous self-reflection on professional performance to make improvements to lesson planning, instructional material, and delivery of instruction for the next school year.
